CLASSIFICATION

EXEMPTION

2- (#49)

On three occasions between 2100 and 2300 hours during the night of 1956, it was observed from Ft. Cav. [redacted] in [redacted] In 75-80 ft. above the ground, that a white drop-shaped object that was [redacted] than a white JFW or [redacted] brighter than a gliding shooter [redacted] starlight from west to east; north of the camp and apparently at [redacted] the same altitude. The arc was 2/10 crescent, other PWs made the same observation on other days at the same hour. The flying object itself could not be seen but only the [redacted] when darkness instantly did not change. No trails were observed nor were the sounds of its thrust heard. The observations were made at an elev. about a mile at about 65 degrees and in a scratch angle of about 60 degrees, since further observations of the flight path was obstructed by trees. The plane required about 1 second for flying through the angle of 60 degrees. When the observation was made for the first time, the PWs believed they had seen a shooting star slide for the phenomenon appeared and disappeared so quickly. When this occurrence was observed several times, however, it was assumed to be a flying body.

[Field Comments: The type of the flying object can not be inferred from the existing statements. The report indicates that unidentified flying bodies were also observed in the same area [sic] 11 N 45° 12' E.]
