about sin _nin/ o'clo the Caspian Sea befor	ock, we traveled south or se dark. After stopping	at Algat, our dire	mph, reaching ction of travel
about six Inin o'clothe the Caspian Sea before changed from south to Alyut and 15 or 20 mi of the party who was sen it! I just say a outcide for some time see anything unusual outside.  2. We turned the light of form above the horizon above the horizon against the sky but a with a blight dome on rising rather slowly connected with the ob which was about the strate of pink. I have from this perspective rather strater for figure glow noving slowly as	ock, we traveled south a re dark. After stopping a west. At 7:10 o'elock intes before our arrival in an adjoining comparts of flying saucer!" We have so the light was on in off as quickly as possion to the south. Its property was a strictly direction in a vertical direction joot, a white light on seem color as an aircrafte no estimate of its direction in a vertical to be about the property. It continued the perimeter in a sound the perimeter in a	t a speed of 25-30 at Alyat, our directly ten minute lat Alzhikabul (Kanent rushed in and deen talking and ttention to the winth compartment and the compartment and the compartment and it, it was off the fit, it was off the stop and on the perit engine exhaust, ment the size of a MCC intestice from us, postinged to rice verticelectries directle	mph, reaching oftion of travels after leaving si-hogomed) on exclaimed "I had not looked dow, we did not it was twilight at a shadow, ly outlined at ad balloon ground and ources of light mater, a glow hite with a giving the cally with the a giving the
about six Inin o'cle the Caspian Sea befor changed from south to Alyat and 15 or 20 mi of the party who was sen it! I just saw a outcide for some time see anything unusual outside.  2. We turned the light of form above the horizo against the sky but a with a slight dome on rising rather slowly connected with the ob which was about the s trace of pink. I hav From this perspective rather stubby for fig glow nowing slowly as agairstness of a pinwh the horizon, the spin from us, and it then I would estimate that	sek, we traveled south a redark. After stopping a west. At 7:10 o'elock intes before our arrival in an adjoining comparts flying saucer!" We have turned our a as the light was on in to the south. Its property to the south. Its property a vertical direction of the color as an aircrafte in a vertical direction of the appeared to be about the property. It continued the perimeter in a seal, when it reached a seal a seal, when it reached a seal a s	t a speed of 25-30 at Alyat, our directly ten minute lat Alzhikabul (Kanent rushed in and deen talking and ttention to the winth compartment and le. At this time, offile was not clearly deflict, it was off the top and on the popie tengine exhaust, our the size of a MCC inued to rice verticely directions direction altitude of 10-15 remaining fixed on a jet plane doing	mph, reaching oftion of travel stafter leaving zi-hogomed) one exclaimed "I had not looked dow, we did not it was twilight for a shadow, by outlined atod balloon ground and ources of light mater, a glow hite with a cally with the cally with the cally with the digrees from the side away gover the trail a fly-by.
about six [nig/] o'clothe the Caspian Sea before changed from south to Alyate and 15 or 20 mi of the party who was sea it! I just saw a outside for some time see anything unusual outside.  2. We turned the light of form above the horison against the sky but a with a slight dome on rising father slowly connected with the obtained as about the trace of pink. I have From this perspective rather stuby for figure moving slowly acceptance of a pink the horison, the spin from us, and it then I would estimate that The light on top disconducted size to any greaters size to any greaters size to any greaters size to any greaters.	cek, we traveled south a redark. After stopping o west. At 7:10 o'elock in the sefere our arrival in an adjoining comparts of flying saucer!" We have the west was on in as the light was on in fift as quickly as possion to the south. Its properated to be shaped life top. When I first say in a vertical direction spect, a white light on seen coordinate of its direction of the spectral to be about the perimeter in a result the perimeter in a seal. When it reached as it entered to be about the perimeter in a seal. When it reached as it can greated as it can the perimeter that the perimeter in a seal. When it reached as at the seal of the s	t a speed of 25-30 at Alyat, our directly ten minute lat Alzhikabul (Kanent rushed in and deen talking and stantion to the winter compartment and le. At this time, offile was not clearly defile it, it was off the top and on the position and on the positions from us, positioned to rise vertical from us, positioned to rise vertical altitude of 10-15 remaining fixed on a jet plane doing of us. The object coard us. The object	mph, reaching oftion of travel staffer leaving zi-hogomed) one exclaimed "I bed not looked dow, we did not it was twilight for a shadow, ly outlined at ad balloon ground and ources of light mater, a glow hite with a side ally with the cally with the degrees from the side away gover the trail of a fly-by, did not some tong round at a fly-by, did not some tong round at
about six /Dig/ o'clothe the Caspian Sea before changed from south to Alyat and 15 or 20 mi of the party who was saw it! I just saw a outside for some time see anything unusual outside.  2. We turned the light of form above the horizon against the sky but a with a slight dome on rising rather slowly connected with the obtains rather stubby for fig glow moving slowly as a presence of a pinus the horizon, the spin from us, and it then I would estimate that The light on top disconding size to any granded track. I as winder, incidents railroad track. I as	sek, we traveled south a redark. After stopping a west. At 7:10 o'elock in the stopping of the stopping and a stopping and stopping as the light was on in the stopping as the light was on in the stopping as the stopping as the stopping of its off as quickly as possible to the south. Its property of the stopping and a stopping the stopping to be about the perimeter in a section of the stopping as the stopping the stopping the stopping the stopping as the stopping the sto	t a speed of 25-30 at Alyat, our directly ten minute lat Alzhikabul (Kanent rushed in and deen talking and ttention to the winth compartment and the compartment and le. At this time, offile was not clearly deflict, it was off the top and on the position and the size of a AEC inued to rice vertically deflicted to rice vertically deflicted to rice vertically deflicted to rice vertically deflicted and the size of a AEC inued to rice vertically deflicted a altitude of 10-15 remaining fixed on a jet plane doing a jet plane a jet plane doing a jet plane a je	mph, reaching oftion of travel stafter leaving zi-hogomed) on exclaimed "I had not looked dow, we did not it was twilight for a shadow, by outlined at a delicen ground and ources of light mater, a glow hite with a side which it with a side away gover the trail of the standing of the standing to
