Checutive Officer?
Central Intelligence Agency
Wasnington 25, D.C.

Dear E. Earman

With the approval of Zoard zerbers with whom I have discussed the situation. I am writing exain to ask what part the Contral Intelligence Agency plays in the official investigation of the unidentified flying objects.

Since January 1953 I have been aware of the fact that the Central Intelligence Agency Resembles a group of scientists at the Pentral control of scientists at the Pentral to examine the evidence on 1898 and to decide or suggest a confidence. Several mantages I was questioned by an investion of the McCiellan Subcommittee on Government Operations. During one of the several interview in which I gave the subcommittee mass of verified evidence, I told the investigator of the 1953 meeting of scientists and suggested that he ask for the copy the official report.

Inter no told me that the Air Force explained that this was not a Air Force document and that they would have to ask the approve the agency involved. On still another constitution the investigational that this had proved to be the Central Intelligence Arand that he had been sent a summary of the full report, which we classified.

Until that time, the Air Force had officially denied the existe of any such document. Bowever, shortly after I had the verific from the McClellan subcommittee investigator, the Air Force at mitted that there was such a document, as I had old med. With a short time they released want they said was a summary of the main points, and the completions of the scientists. No mention was made of the compection with the Central Intelligence Agen.

Chr. J. S. Eirnand B3
Control Intalligence Agency
Wisnington 25, D.C.

Dear E. Earman

B3

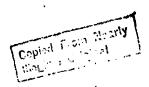

With the approval of Poard zerbers with whom I have discussed the situation. I am writing exain to ask what part the Council Intelligence Agency plays in the official investigation of the unidentified flying objects.

Since January 1953 I have been aware of the fact that the Central Intelligence Agency assembly a group of scientists at the Pent to examine the evidence on Live and to decide or suggest a jou of action. Several months are I was questioned by an investive of the McClellan Subcommittee on Government Operations. During one of the several interview in which I gave the subcommittee a mass of verified evidence, a told the investigator of the 1951 neeting of scientists and engasted that he ask for the copy the official report.

Inter no told we that the Air Force explained that this was not Air Force document and that they would have to ask the approve the agency involved. On still another occasion the investigational metal that this had proved to be the Central Intelligence Arand that he had been sent a summary of the full report, which we sitesified.

Until that time, the Air Force had officially denied the existe of any such document. However, shortly after I had the verification the NaClellan subcommittee investigator, the Air Force at mitted that there was such a document, as I had claimed. With a short time they released what they said was a summary of the main points, and the consisting of the scientists. No mention was used of the consistion with the Control Intelligence Agen

J 8

pines them, requests for the full report of this group have governedused, in the grounds that the report is classified.

Ins Masignel Investigations Committee is heroby requesting teor multication of this full mount so that we may examine the decreases and the syldence along with the scientists' conclusions.

Ine Air Force has repeatedly cated that there is absolutely no denger connected with uniqualified flying objects. It has a impain that there is no classification as regards national security I this similated "official use only" classification, which, the Air Force says, is to protect the names of witnesses who do not simulto se publicly listed.

Since the CIA document is said not to list witnesses hames but to discuse the general problem, there is no reason apparent any it should not be declassified, as requested.

Despite the published conclusions of the 1953 scientists group, we have found that there is an increasing public bolief that the 1962 may possibly be unfriendly. We have absolutely no evidence to prove that they are heatily and I alto this only to prove the danger of the present secrecy volicy. Secrecy breeds ignorance of the subject and it could and to hysteris or even panicular correct correct conditions. I believe that an open discussion of the problem would serve the best interests of the country.

In addition to requesting a copy of the formal report drawn up by the scientists in 1953, Wish Proquests an interview with an official of the Control Intelligence Agency who is quilified to speck for the GIA on this subject. It is our ballof that a frank discussion of the problems will be of mutual benefit.

In my previous lotters, I gave you the name of some of our Board members, including Vise Admiral R. H. Hillenkoetter, USY (Ret.) who formerly was director of the Control Intelligence Agency. I am sure that Admiral Hillenkoetter, as well as all the members of our Board and cur Special Advisors would tell you, if questions that they disagree with the present secrecy about unidentified flying chiects.

With a membership covering all 49 states and many foreign countries except those in the UCSR, NICAP has, by its serious, factual are proach wan the attention of many important citizens here and sor Our factual press releases have been given serious attention by the press and by newscasters. We are in a position to help citizens in America, and elecators, for the facts which eventually will to be made public. We hope the Control Intelligence Agency will agree to a conference or at least an interview on the various are pects of this problem.

Sincorely yours,

DEKIR

DONALD S. KEYHOS, Major USAC (F.
