In the spring of 1954, I was hospitalized for	tresizent for ellow	
jaundice at a military hospital near the Barri (48 h8 m = 44 32 m). On two occasions during	lkadi Munitions Works	
convalescence. I. as well as other naticate at	t the borottel cherryel	
the flight of an unknown object from horizon t coutheast to northwest. This object appeared	to tixelean. Flying from	
cannot describe the object, but as I remember.	. it took approximately	
one minute for the object to leave the range of	or my vision. This	Į
object caused a great amount of vibration in t	the air and made a	
object caused a great amount of vibration in t screeching, whistling noise which was differen bade by an artillery shell in flight. I could	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in t socretching, whistling noise which was differen	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in to ocreeching, whistling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air w	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in to screeching, which ling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air w	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in to screeching, whistling moise which was different cade by an artillary shell in flight. I could itself, but I did see disturbance in the air w it.	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in to screeching, whichling moise which was different code by an artillary shell in flight. I could itself, but I did see disturbance in the air witt.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, whistling noise which was different tode by an artillary shell in flight. I could itself, but I did see disturbance in the air w it.	the air and made a at from the noise I not use the object	
object caused a great amount of vibration in to screeching, whichling moise which was different made by an artillery shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, whichling moise which was different code by an artillary shell in flight. I could itself, but I did see disturbance in the air witt.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, whichling moise which was different made by an artillery shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, whichling moise which was different code by an artillary shell in flight. I could itself, but I did see disturbance in the air witt.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling moins which was different made by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop

object caused a great amount of vibration in to ocreeching, whichling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling noise which was different node by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to ocreeching, whichling noise which was different tode by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, valuating moise which was different made by an artillary shell in flight. I could itself, but I did see disturbance in the air wit.	the air and made a at from the noise a not see the object dich aresed to enyclop	
object caused a great amount of vibration in to screeching, whichling moise which was different code by an artillary shell in flight. I could itself, but I did see disturbance in the air witt.	the air and made a at from the noise a not see the object dich aresed to enyclop	

- During the early part of My 19%, I was told by several engineers, close
 associates them I believe to be raliable, that the Ministry of before was
 alerted concerning the over-flight of a formation of unknown flying objects,
 flying in an ensternly direction during that menth.
- 2 By friends related that but appeared to be aircraft, flying in formation at an extremely high rate of speed at approximately twenty-five this which meters, were observed by redar units of the Bras Air Defends Command. Bithing was done to disturb this flight, the probable remain being that the Bras Air Defends Command had no weapons at its disposal to reach these introders.
- During the same period, May and June 1970, many reports originating from all sections of Eugery cited the appearance of "Flying Sourcers". For two or three weeks, reports appeared almost daily, describing these objects as fast-flying objects which could change direction of flight, secaleration and decaleration with wester may. By friends told so of discussions at the bar Technical Institute is which Eugery's leading mathematicians, engineers and technical and last part, converning these sojects. It was decided that they did not exist and that if anything, the reports were in 11-6 by US propagation. As efficial automaticated in "Bashed Rep" declaring the extire "flying saucer" scare was a syth.
- As intermetted of servicion of one of m, soli-aguag boowver, was "Even if they in t colet, I hope they are on their way to both Boorce."
